

OLATUNJI SARAH MORENIKEJI

Full Stack Developer

Lagos, Nigeria • olatunjisarahmorenikeji@gmail.com • +2349067121091 • [Portfolio](#)

PROFESSIONAL SUMMARY

Self-taught full stack developer based in Lagos, Nigeria, with nearly a year of intensive hands-on experience. Proficient in building complete web applications from the ground up — covering responsive frontends with React, RESTful APIs with Node.js and Express, database design with MongoDB, secure authentication with JWT, and cloud media management with Cloudinary. Demonstrates the ability to ship real, production-deployed projects independently with no formal training.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Backend	Node.js, Express.js, Socket.IO, RESTful API Design
Database	MongoDB, Mongoose ODM, MySQL
Auth & Security	JWT, bcrypt, Role-based Access Control
Cloud & Tools	Cloudinary, Git, GitHub, Vercel, Render
UI Practices	Responsive Design, Mobile-First Development, Component Architecture

PROJECTS

LuxLab — Luxury Barbershop Platform [Full Stack]

Stack: React, Node.js, Express, MongoDB, JWT, Cloudinary | [Live Portfolio](#)

- ▶ Built a complete salon booking web app with separate Admin and User dashboards.
- ▶ Admin can upload hairstyle images with name and pricing; users browse the gallery and book appointments.
- ▶ Implemented JWT-based authentication with role-based access control (admin vs. user).
- ▶ Integrated Cloudinary for image uploads; appointment system includes approval workflow with email notifications.
- ▶ Handled full backend: REST API routes, MongoDB models, auth middleware, and protected endpoints.

Africana-Swallow — African Food Restaurant [Full Stack]

Stack: HTML, CSS, JavaScript, Node.js, Express, MongoDB | [Live Site](#)

- ▶ Built a full stack restaurant website featuring an interactive menu and ordering experience.
- ▶ Developed the backend with pure JavaScript (Node.js/Express) without any frontend framework.
- ▶ Integrated MongoDB for data persistence and deployed the backend live on Render.

AgroTech — Farm Produce Delivery [Frontend — React]

Stack: React.js, CSS | [Live Site](#)

- ▶ Originally built in vanilla HTML/CSS/JS, then fully rebuilt in React to demonstrate framework proficiency.
- ▶ Connects consumers directly with local farmers for fresh organic produce delivery.
- ▶ Showcases component-based architecture, state management, and React best practices.

Music Catalog — Streaming UI [Frontend — React]

Stack: React.js, CSS | [Live Site](#)

- ▶ Rebuilt original vanilla JS music streaming UI in React, demonstrating ability to migrate projects to modern frameworks.
- ▶ Features artist browsing, song catalog, and streaming interface built with reusable React components.

Other Frontend Projects [Frontend]

Stack: HTML, CSS, JavaScript | [View All on Portfolio](#)

- ▶ Trendverse (fashion e-commerce), MediCare (hospital website), Sarah's Perspective News, Calculator App.
 - ▶ All deployed on Vercel — demonstrating consistent ability to design and ship polished, real-world UI projects.
-

EDUCATION & LEARNING

Self-Taught Full Stack Developer | 2025 – Present

Independently studied frontend development for 7+ months (HTML, CSS, JavaScript, React), then transitioned to full stack development — learning Node.js, Express, MongoDB, JWT authentication, REST APIs, and Cloudinary integration through building real projects.

WHAT I BRING

- ▶ Ships real, deployed projects — not just tutorials or unfinished work.
- ▶ Fast learner — went from zero to full stack in under a year through self-discipline.
- ▶ Builds complete systems independently: frontend, backend, auth, database, and cloud storage.
- ▶ Available for internships, junior developer roles, and freelance projects.
